

Application Procedures

Use Prominence™/MC Heavy Duty Cleaner to remove soil from floors without dulling the appearance of the floor finish.

Dilute with cold water. For daily cleaning, use a spray bottle, mop and bucket or fill auto scrubber and use red pads. For Deep Scrubbing, fill auto scrubber and use green or blue pads. Pick up soil and excess cleaner with a tightly wrung out cleaning mop or cloth.

Use Suma® Bio-Floor® Cleaner D3.7 on kitchen floors with quarry tile, ceramic tile, or vinyl.

Post "Wet Floor" signs around area to be cleaned. Dispense proper strength solution of product and warm or hot water in a mop bucket. Spread diluted product with a clean mop generously to the floor, overlapping mop strokes. For best results, scrub the floor with a brush, especially if the floor has grout. Dry mop or squeegee floor dry or allow floor to air dry before reuse. A potable water rinse is only required for those surfaces that may contact edible product.

Use Pro Strip™ SC High Efficiency Floor Stripper to remove existing floor finish.

Blockade areas to be stripped. Floors will become very slippery when stripper is applied. Exercise caution.

Use Crew® Restroom Floor and Surface SC Non-Acid Disinfectant Cleaner to clean restroom toilets, sinks, floors and walls.

Apply use-solution to hard, nonporous surfaces. Thoroughly wet surface with a cloth, mop, sponge, sprayer or by immersion. Allow to remain wet for 10 minutes. Wipe dry or allow to air dry.

Use UHSTM/MC SC Floor Cleaner to clean burnished, ultra high speed floor finishes.

Dilute with cold water. Apply use-solution with a mop and bucket or an automatic scrubbing machine. Trail mop behind machine to pick up any excess solution. Allow to dry.
