

Application Procedures

Use Suma® Bio-Floor® Cleaner D3.7 on kitchen floors with quarry tile, ceramic tile, or vinyl.

Post “Wet Floor” signs around area to be cleaned. Spray or dispense product with warm or hot water onto the floor or in a mop bucket. Spread diluted product with a clean mop generously to the floor, overlapping mop strokes. For best results, scrub the floor with a brush, especially if the floor has grout. Dry mop or squeegee floor dry or allow floor to air dry before reuse. A potable water rinse is only required for those surfaces that may contact edible product.

Use Crew Clinging Toilet Bowl Cleaner to clean and disinfect toilets and urinals.

Apply product to toilet bowl side or to urinal surfaces. Scrub entire unit, especially under the rim at water outlets. Wait one minute, then flush.

Use Oxivir® Tb one-step cleaner disinfectant to wipe hard, non-porous surfaces.

Pull wipe from canister, wipe surfaces, allowing them to stay wet for one minute. Allow to air dry or rinse according to use instructions on some surfaces.
